Preliminary Course Outline

Course overview

This course is designed to develop the student's ability to analyze and critically evaluate arguments from a logical point of view. It will provide students with a basic understanding of such concepts as reasons, implication, validity, and fallacies. Students will learn the logical principles of deductive and inductive inferences and the techniques of applying them for determining the validity of arguments. Elements of good reasoning from an informal perspective will also be covered.

Learning outcomes

- ◇ Acquire analytic skills and a critical disposition.
- ◇ Grasp the central concepts in classical logic.
- ◇ Demonstrate familiarity with major proof-theoretic methods in propositional logic.
- ◇ Translate arguments in ordinary language into symbolic argument forms.
- ◇ Identify, classify, and assess arguments in various contexts.
- ◇ Identify and analyze informal fallacies.

Topics

1. Introduction
2. Basic Concepts
3. Deduction and Induction
4. Categorical Syllogisms
5. Propositional Logic
6. Natural Deduction in Propositional Logic
7. Informal Fallacies

Assessment scheme

<i>Task nature</i>	<i>Description</i>	<i>Weight</i>
Class participation	In-class discussion	10%
Mid-term exam	Exam	40%
Final exam	Exam	50%

Learning activities and workload

- ◇ Lecture: 2 hours for each lecture
- ◇ Reading for each topic
- ◇ Online exercises: about 30 minutes for each exercise

We use Blackboard Learn for this course. Lecture notes and information on tutorial assignments and examinations will be posted on the website.

Academic honesty and plagiarism

Attention is drawn to University policy and regulations on honesty in academic work, and to the disciplinary guidelines and procedures applicable to breaches of such policy and regulations. Details may be found at http://www.cuhk.edu.hk/policy/academic_honesty/.

With each assignment, students will be required to submit a signed [declaration](#) that they are aware of these policies, regulations, guidelines and procedures. For group projects, all students of the same group should be asked to sign the declaration.

For assignments in the form of a computer-generated document that is principally text-based and submitted via VeriGuide, the statement, in the form of a receipt, will be issued by the system upon students' uploading of the soft copy of the assignment. Assignments without the receipt will not be graded by teachers. Only the final version of the assignment should be submitted via VeriGuide.
